

Get Customers — \$1,000

\$1,000 One-Time

Turn your site into a lead machine. Everything in Get Found plus backend, CRM, and Google presence.

What's Included

- Everything in Get Found (\$600)
- Order/booking form with live pricing logic
- Google Sheets CRM — every inquiry auto-logged with timestamp
- Automated email notification on every inquiry (Google Apps Script)
- Google Business Profile optimization
- Basic on-page SEO (title, meta description, Open Graph tags, schema)
- 3 months of free changes after launch

Fulfillment Steps

STEP 1

Intake — Gather Everything Upfront

- Same as Get Found intake (logo, colors, content, contact info)
- Ask for: services list with pricing (for booking form)
- Ask for: Google account login or confirm they have Google Business access
- Ask for: any Google Business photos they want uploaded
- Confirm their preferred notification email for form submissions

STEP 2

Build the Website

- Create folder: FJDMedia/Websites/[Client Name]/
- Build Website.html — all sections including order/booking form
- Wire contact form to Web3Forms (email backup)
- Add live pricing logic to booking form (JS — updates total on selection)
- Mobile-first — test all breakpoints

STEP 3

Google Apps Script Backend (CRM)

- Create a new Google Sheet in client's Google Drive (or James's Drive)
- Name the sheet: [Client Name] — Orders/Inquiries
- Paste appsscript.js into script.google.com → new project
- Update the script: set client email, sheet name, and column headers
- Deploy as Web App: Execute as Me, Access: Anyone
- Copy the deployment URL
- Paste GAS URL into Website.html (replace YOUR_APPS_SCRIPT_URL placeholder)
- Test form submission — confirm row appears in Sheets + email arrives

STEP 4

On-Page SEO Setup

- Set tag: [Business Name] | [City] | [Primary Service]
- Write meta description (150–160 chars) — include city + service
- Add Open Graph tags (og:title, og:description, og:image, og:url)
- Add Local Business JSON-LD schema (name, address, phone, hours, url)
- Confirm all images have descriptive alt text

STEP 5

Internal QA Before Preview

- Form submits → email arrives → row logged in Google Sheet
- Pricing logic updates correctly on selection
- All SEO tags present and correct (view source to verify)
- Mobile nav, buttons, links all working
- No broken images, no placeholder content

STEP 6

Deploy to GitHub Pages (Preview URL)

- Create empty public repo on GitHub under fjdmedia account
- Push project: git init → git add . → git commit → git push
- Enable GitHub Pages: Settings → Pages → Branch: master → root → Save
- Share preview URL with client

STEP 7

Google Business Profile Optimization

- Log into Google Business Profile with client's Google account
- Verify all info is accurate: name, address, phone, hours, website URL
- Upload high-quality photos (exterior, interior, team, products/services)
- Write or update the business description (include city + primary keywords)
- Add all services with descriptions
- Confirm profile is verified (if not, initiate verification process)

STEP 8

Client Approval

- Present preview URL — walk through site + backend demo
- Show Google Sheet logging live with a test submission
- Collect revisions, make changes, get explicit approval
- Collect payment via e-transfer before domain purchase

STEP 9

Custom Domain Setup (after approval + payment)

- Buy domain on Namecheap (~\$10–15/yr)
- Add custom domain in GitHub Pages settings
- Update DNS records on Namecheap
- Wait for SSL activation (up to 24hrs)
- Update sitemap and schema URL to reflect live domain

STEP 10

Handoff

- Send live URL + Google Business Profile link
- Walk client through Google Sheet so they understand their CRM
- Remind them of their 3 months of free changes
- Pitch the Grow retainer (\$300/mo) — frame as: you built the machine, now let's run it
- Request a written testimonial within 30 days of launch
- Book a 30-day check-in call
