

Linktree — \$300

\$300 One-Time

Branded link-in-bio for realtors, creators, and small businesses. Replaces generic Linktree or Canva links.

What's Included

- Custom branded single-page link hub
- Client avatar + bio
- All real links: phone, email, socials, booking
- 72-hour spec preview countdown (used as pitch mechanic for cold prospects)
- GitHub Pages hosting
- Upsell path: Get Found (\$600) or Get Customers (\$1,000) for a full site

Fulfillment Steps

STEP 1

Prospect Research (Cold DM strategy)

- Use FJMedia Prospector tool to find target businesses by niche + city
- Identify prospects with weak or no link-in-bio
- Gather: their Instagram handle, bio, website (if any), contact info from profile
- Note their niche, vibe, colors — build to match their brand before reaching out

STEP 2

Build the Linktree Spec (before contacting)

- Create folder: FJMedia/Websites/[Client Name]/
- Build Website.html — single page, branded to their vibe
- Include: avatar/photo, name, tagline, all visible social links, phone, email, booking link
- Set a 72-hour countdown timer (expires after 72hrs from send time)
- Deploy to GitHub Pages immediately after build

STEP 3

Cold DM Pitch

- Use FJMedia DM Writer tool to generate the outreach message
- Short version first: mention you built something for them, include the live link
- 72hr countdown creates urgency — they need to click to see it
- If no reply in 3–4 days, send follow-up: 'Just circling back — link's still up if you want to see it.'

STEP 4

Client Approval + Payment

- If they reply positively, offer to keep it live permanently for \$300
- Collect payment via e-transfer
- Remove the countdown timer after payment
- Update any links they want changed

STEP 5

Handoff

- Confirm the live GitHub Pages link is their permanent link
- Remind them to update their Instagram bio link
- Pitch the upgrade: 'This is just the starting point — I can build you a full site for \$600'
- Request a quick testimonial or screenshot to use as a case study
