

— WEB PARTNER FOR LOCAL BUSINESSES

What you're *actually paying for.*

This isn't a \$29 Wix subscription. It's a custom site, the plumbing behind it, and one person who owns it end to end — sized to your revenue, shipped in 48 hours.

OWNERSHIP

Yours — all of it

Code, domain, data, Google profile. No subscription to anything I provide.

SPEED

48 hours

Deposit locks the build. Live before most agencies send their first invoice.

BUILT FOR YOU

Not a theme

Custom code. No Wix. No Shopify. No templates.

TIER 01

Launch

Clean presence. Custom site, mobile-ready, on Google.

TIER 02 · ★

Foundation

Launch + lead capture, email alerts, SEO, Google Maps.

TIER 03

Authority

Foundation + 6 months managed. Scoreboard + content swaps.

— WHY NOT JUST WIX IT

Cheap up front. Expensive across three years.

Most owners look at \$29/month and think it's the bargain. Run the math on time, rent, and the work you didn't know had to happen — the math flips.

PATH A · DIY / WIX

You, on your weekends.

Or you, never getting around to it.

YOUR TIME

40–80 hours

Learning a builder, picking a template, writing copy, wrestling with images. That's a month of evenings — minimum.

SUBSCRIPTION RENT

\$612 – \$1,400

Wix / Squarespace at \$17–\$39/mo × 36 months. You pay forever. You own nothing.

TEMPLATE TRAP

400+ look-alikes

The same theme is running on hundreds of other Winnipeg sites. Visitors can feel it.

HIDDEN PLUMBING

Missing by default

Schema, meta tags, Google Business sync, form reliability, mobile edge cases. None of that comes in the \$29/mo box.

PATH B · FJMEDIA

Me, on a 48-hour clock.

You, back to running the business.

YOUR TIME

30 minutes

One fit call. Photos, logo, a few words about what you do. I handle the rest.

ONE-TIME FEE

Sized to revenue

Quoted on the fit call. Priced against the lift the site will drive, not the hours I spend building it.

BUILT FOR YOU

One of one

Custom design, custom copy, your photos. Nothing you'll see running on another business.

PLUMBING, HANDLED

All of it, live on day one

Schema, meta, Google Business, reliable forms, mobile tested. The stuff that makes a site actually work.

DIY isn't cheaper. It's **delayed and thinner**. You pay in weekends, monthly rent, and lost customers who bounced off a site that looked like everyone else's.

— THE INVISIBLE WORK

What's happening *behind the build.*

A site isn't one thing — it's fifteen. Most owners never see this list. You're paying for every item on it.

01 Design

Before a line of code

Layout from scratch

Your sections, your flow. Not a drag-and-drop theme.

Copy that sells

I write the headlines and body. You don't stare at a blank box.

Photo direction

I tell you which photos help and which ones hurt. Cropping, order, pairing.

02 Build

Custom code, every page

Hand-written HTML/CSS

No theme, no builder. Fast, clean, nothing you don't need.

Mobile tested

iPhone, Android, tablet, desktop. I check every screen, not just one.

Forms that notify you

Contact / booking form wired to email. Inquiries hit your inbox the second they hit submit.

03 Setup

The plumbing Wix skips

On-page SEO

Title tags, meta, Open Graph, schema. So Google knows who you are and what you do.

Google Business Profile

Set up or optimized. Maps pin, hours, photos, category — the profile that shows up in local searches.

Analytics wired in

You see traffic, where it comes from, what pages get read. Not theory — real data.

04 Launch

The part that goes live

Domain + DNS

Your address (yourshop.ca) pointed at the live site. HTTPS on from day one.

Speed checks

Images compressed, fonts trimmed, scripts minimized. Loads fast on 4G, not just fiber.

QA pass

Every link, every form, every button — tested before it hits your customers.

05 Watch

After launch — the part nobody includes

Free changes window

30 days (Launch) to 6 months (Authority) of edits on me. No meter running.

Monitoring

Forms checked, uptime watched. If something breaks, I see it before you do.

One person to call

Not a support ticket. Not a chatbot. Me. Same number every time.

— FIGHT CAMP, THREE DEPTHS

Same work. Different depth.

Every tier includes the build and the plumbing on page 3. What changes is how much of the ongoing work I own after launch. Pick the one your revenue can back.

TIER 01

Launch

"You're in the ring."

Solo operators and small shops. No site yet, or one that's embarrassing to send people to.

INCLUDES

- 5–7 page custom site
- Mobile, tablet, desktop
- Contact form → your inbox
- Domain + hosting wired
- Indexable on Google

AFTER LAUNCH

- 30 days of free changes

TIER 02

MOST PICKED

Foundation

"Corner, trainer, game plan."

Staffed shops with booked schedules. You want the site to capture leads, not just look good.

EVERYTHING IN LAUNCH, PLUS

- Booking / order form with logic
- Google Sheets CRM (every lead logged)
- Email alerts on every inquiry
- Google Business optimized
- On-page SEO (title, meta, OG, schema)

AFTER LAUNCH

- 3 months of free changes

TIER 03

Authority

"Full camp behind you."

Multi-staff or multi-location. You want the site managed — no DIY, no forgetting about it.

EVERYTHING IN
FOUNDATION, PLUS

- Analytics + monthly scoreboard
- Seasonal content swaps (menus, pricing, photos)
- Local SEO monitoring
- Priority support · 24 hr response
- Quarterly strategy sit-down

AFTER LAUNCH

- 6 months of managed maintenance

PRICING

Quoted on the 15-min fit call — sized to your revenue.

SHIPS IN

48 hours from deposit.

AFTER THE INCLUDED WINDOW

**Keep me on.
Or don't.**

Maintain · \$150/mo

Month to month. Cancel anytime.

Updates, form monitoring, uptime checks, monthly analytics snapshot. The site stays healthy without you thinking about it.

Grow · \$300/mo

Month to month. Cancel anytime.

Maintain plus content swaps, local SEO monitoring, and a 1-on-1 sit-down each month — what's working, what to change.

- PRICING LOGIC

You're paying for *what it brings back.*

Not hours. Not keystrokes. A cut of the revenue lift the site will drive over the next three years. That's why the price lives on a fit call — I need your numbers first.

THE RULE OF THUMB

Roughly 10% of the annual revenue lift the site is expected to drive.

Two extra customers a month at your margin — that's the number the site is worth. Price is a slice of that, paid once. Not **monthly rent forever**.

WHY NO LIST PRICE

A \$400/yr side hustle and a \$500K shop shouldn't pay the same.

Same build, different backing. Quoting before I know your revenue is how agencies overcharge small ops and **underdeliver** to bigger ones.

AGENCY

\$5,000 – \$10,000

4–8 weeks. Deposit up front. You're a project number.

WIX / SQUARESPACE

\$17 – \$39 / month

Forever. Templates. You own nothing.

FJMEDIA

Fair · One-time

Sized to your revenue. You own all of it.

THE COMPOUND

2 extra customers a month × 36 months = your payback window.

Run the math with your own average ticket. Most builds pay themselves back in the first quarter, then keep working for the next 2.75 years at zero cost.

EXAMPLE A · BAKERY

Two extra orders a month at \$50.

Monthly lift	+\$100
Annual lift	+\$1,200
Three-year lift	+\$3,600

Site pays for itself inside year one.

EXAMPLE B · AUTO DETAILING

Two extra jobs a month at \$250.

Monthly lift	+\$500
Annual lift	+\$6,000
Three-year lift	+\$18,000

Site pays for itself in month three.

— OWNERSHIP, NOT RENT

Your site. *Actually yours.*

When we're done, nothing about this site keeps running on my permission. Here's what you walk away with.

01

The code

Every file. Yours to keep, move, or hand to the next developer. Nothing is locked behind a FJMedia login.

02

The domain

Registered in your name, on your account. You control it. If we ever part ways, the address stays yours.

03

The data

Every lead, every form submission — sitting in your Google Sheet, on your Google account. Export it, move it, keep it.

04

The Google profile

Your Business Profile, under your login. I optimize it, you own it. Reviews, photos, hours — all under your control.

THE LOCK-IN TAX

Stop paying **Wix / Shopify** — your site disappears.

The moment the subscription lapses, so does your site. Three years of work, gone. And the content lived on their servers the whole time.

Stop paying **me** — your site keeps running.

Hosting is yours. Domain is yours. If the retainer ends, the site doesn't. That's the difference between renting and owning.

HANDOFF KIT

Credentials doc

Every login — domain registrar, hosting, Google account, analytics. One page, in your inbox.

HANDOFF KIT

Site backup

Full zip of the site files. If you ever want to move, the next developer picks up where I left off — no rebuild.

HANDOFF KIT

Walkthrough video

10 minutes. How to read the scoreboard, where the leads land, how to swap a photo yourself if you want to.

— FROM CALL TO LIVE

Three days. *That's the whole thing.*

Most agencies take a month to send you an invoice. This is the full timeline — from the call that quotes you to the site on your domain.

01 The fit call DAY 0 · 15 MIN

I ask your revenue, your margin, what the site needs to do. You get a real number before you hang up. Quote is good for 7 days.

02 Your 30 minutes DAY 1 · INTAKE

Logo, photos, a few sentences about what you do. Sent by email or dropped in a shared folder. That's your job done.

03 The build DAY 1-2 · 48 HRS

Design, copy, build, wire the forms, set up the Google profile, check every screen. You see a preview link when it's done.

04 The handoff DAY 3 · LIVE

Domain pointed. HTTPS on. Analytics ticking. You get a walkthrough — how the form works, how to read the scoreboard, where the leads land.

05 The window 30 DAYS — 6 MONTHS

Free changes window starts day one. Spot a typo, want a photo swapped, need a new section — text me. No meter.

COMMITMENT 01

If I'm not the fit, I say so on the call.

Wrong stage, wrong niche, wrong budget — I'll tell you. No slow-walk, no proposal theater. Your 15 minutes back.

COMMITMENT 02

One person on the build. Same person after.

No account manager handoff. No junior on the other end. Same number for the quote, the build, and the year after launch.

COMMITMENT 03

Deposit + balance. No subscriptions from me.

Half to lock the build, half on launch. Retainer is optional and month to month. You're not signing a yearly anything.

Built by one person. Shipped at one standard.
